| NOTE | 1. All parameters NOT specially mentioned are measured at 230 VAC input, rated load and $25^{\circ} \mathrm{C}$ of ambient temperature. <br> 2. Ripple \& noise are measured at 20 MHz of bandwidth by using a 12 " twisted pair-wire terminated with a 0.1 uf \& 47uf parallel capacitor. <br> 3. Tolerance : includes set up tolerance, line regulation and load regulation. <br> 4. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. <br> 5. The over temperature protection (OTP) is the built-in function of the control IC (U1). The activating level described above is based on the specification provided by the IC manufacturer. <br> 6. Touch current was measured from primary input to DC output. <br> 7. The ambient temperature derating of $3.5^{\circ} \mathrm{C} / 1000 \mathrm{~m}$ with fanless models and of $5^{\circ} \mathrm{C} / 1000 \mathrm{~m}$ with fan models for operating altitude higher than $2000 \mathrm{~m}(6500 \mathrm{ft})$. |  |  |  |  |  |
