Detached Motion Sensor with **Bluetooth**[®] 5.0 SIG Mesh

HC038V/BT 0/1-10V Output HCD038/BT DALI Output

Product Description

HC038V/BT is a Bluetooth 0/1-10V control base whereas HCD038/BT is a Bluetooth DALI control base with 30mA DALI power supply built in. They work with a wide range of microwave and PIR sensor heads. They are ideal for plastic luminaires as compared to metal luminaires because Bluetooth signal can transmit through plastic. They are suitable for any typical indoor applications such as office, classroom, car park, warehouse and other commercial/industrial areas. With Bluetooth wireless mesh networking, it makes communication much easier without any hardwiring, which eventually adds values to luminaires and saves costs for projects. Meanwhile, simple device setup and commissioning can be done via **Koolmesh**[™] app.

App Features

- G Quick setup mode & advanced setup mode
- B Web app/platform for project deployment & data analysis
- 🖳 Koolmesh Pro app on iPad for on-site configuration
- 🔄 Floorplan feature to simplify project planning
- 🖞 🖯 One-key device replacement
- Device social relations check
- Staircase function (primary & secondary)
- G€ Remote control via gateway support HBGW01
- () Heat map
- A Dynamic daylight harvest auto-adaptation
- Grouping luminaires via mesh network
- Scenes
 - Dusk/Dawn photocell (Twilight function)
- Tri-level control
- Daylight harvest
- Push switch configuration
- Detailed motion sensor settings
- Schedule
- Astro timer (sunrise and sunset)
- Power-on status (memory against power loss)
- 🔅 Offline commissioning
- **E** Bulk commissioning (copy and paste settings)
- Pifferent permission levels via authority management
- Network sharing via QR code or keycode
- 🖧 Interoperability with Hytronik Bluetooth product portfolio

* The detection range is heavily influenced by sensor placement (angle) and different walking paces. It may be reduced under certain conditions.

PIR & microwave sensor heads

The range of PIR and microwave sensor heads below offers powerful number of Plug'n'Play feature options to expand the flexibility of luminaires design. This approach to luminaire design reduces space requirements and component costs whilst simplifying production.

Optional Accessory: Reinforced Bluetooth Antenna

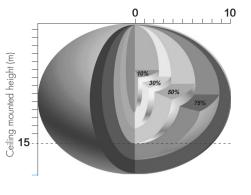

For some special applications, customers may need a larger Bluetooth transmission for both smartphone to device and device to device. Thanks to the reinforced Bluetooth antenna (optional black or white color to choose from), with it being added to the control base HC038V/BT & HCD038/BT, the transmission distance (smartphone to device) enlarges to 20m, the distance of device to device is around 50m.

Dimming Interface Operation Notes

Switch-Dim

The provided Switch-Dim interface allows for a simple dimming method using commercially available non-latching (momentary) wall switches. Detailed Push switch configurations can be set on Koolmesh app.

| Switch Function | Action | Descriptions | |
|------------------------------|--|---|--|
| Push switch | Short press (<1 second) * Short press has to be longer than 0.1s, or it will be invalid. | - Turn on/off - Recall a scene - Turn on only - Quit manual mode - Turn off only - Do nothing | |
| | Double push | - Turn on only - Quit manual mode - Turn off only - Do nothing - Recall a scene | |
| | Long press (≥1 second) | - Dimming - Colour tuning - Do nothing | |
| Sensor-link | / | Upgrade a normal on/off motion sensor to a Bluetooth controlled motion sensor | |
| Emergency Self-Test Function | Short press (<1 second) * Short press has to be longer than 0.1s, or it will be invalid. | - Start Self test (Monthly) - Start Self test (Annually) - Stop Self test - Invalid | |
| | Long press (≥1 second) | - Start Self test (Monthly) - Start Self test (Annually) - Stop Self test - Invalid | |
| Fire Alarm (VFC signal only) | Refer to Koolmesh [™] App User Manual V2.1 | Able to connect the Fire Alarm system Once the fire alarm system is triggered, all the luminaries controlled by the Push Switch will enter the preset scene (normally it's full on), after the fire alarm system gives the ending signal, all the luminaries controlled by this Push Switch will revert back to normal status. | |
